**Name: Claudio Facchin**

**Position:**

**Senior Vice President and Executive Officer**

**CEO of Power Grids Business Unit**

**CEO of Hitachi Energy Ltd.**

**Hitachi Ltd.**

**Abstract title:**

How to contribute to a decarbonized society from the industrial perspective.

**Abstract text (within 100 words):**

Electricity consumption in 2050 is expected to be several times higher than today.

Furthermore, the way of power generation is about to change dramatically in order to realize a decarbonized society.

In other words, it is essential to maximize the use of renewable energy sources and increase the number of power generation facilities that do not emit CO<sub>2</sub>.

The solution is measures that utilize technological innovation and digital technology in the power transmission and distribution divisions.

We will introduce how we can contribute to the realization of a decarbonized society with examples.
