

# Wei Jie LAU

## **Role**

Director/Partnerships/Global Centre for Maritime Decarbonisation

## **Country**

Singapore

## **Career history**

Wei Jie is the Director of Partnerships at the Global Centre for Maritime Decarbonisation (GCMD), a non-profit organization based in Singapore. Established by six founding partners from the maritime industry and supported by the Maritime & Port Authority of Singapore, GCMD's mission is to help the sector accelerate its decarbonisation efforts through shaping standards, deploying solutions, financing projects and fostering collaboration across sectors.

A manager with 9 years of experience in the management of research projects, product development, and funding administration. Wei Jie's background is in chemical engineering, and he has had a variety of assignments relating to various aspects of maritime decarbonisation, including supporting projects across various Technological Readiness Levels (TRL).

Previously, he was a senior manager at the Maritime and Port Authority of Singapore. He oversaw projects, supported the development of the maritime R&D roadmap and successfully delivered outcomes to advance Singapore's maritime interests.

Wei Jie graduated from NUS with BEng (Hons) (Chemical Engineering) in 2011.

## **Areas of expertise**

Wei Jie's interests include decarbonisation of the maritime sector and technology deployment through partnerships and collaborations. He helps to develop impactful projects at GCMD to accelerate the implementation of decarbonised maritime solutions.
