Abstract title: Data Visualization Project in Green x Digital Consortium

Abstract text (within 100 words):

The Green x Digital Consortium was established in October 2021 to contribute to achieving carbon neutrality in 2050 through digitization and the creation of new business models. The members include more than 100 companies and organizations in various industries. Based on trends in decarbonizing the entire supply chain on a global scale, Data Visualization Project is facilitating their efforts to develop methodologies and data linkage mechanisms for visualizing CO_2 data across the entire supply chain while fully utilizing digital technology.
